Fall Season 'Weather Station Put-In '

ALL KAYAK TOURS IN SEPTEMBER AND OCTOBER

Headquarters Number 301-746-4083

Your cell phone service will be limited the closer you get to the Savage Reservoir.

Approx 2 1/2 to 3 1/2 Hours From Washington DC & Baltimore

Directions from Deep Creek Lake

In the fall we meet at the Weather Station Put-In near the dam of the reservoir. It is about 20-25 minutes from Deep Creek Lake. All tours from September 2nd on Meet Here.

Turn on Glendale Road from Route 219. Depending on which direction you are travelling on Route 219 (Garrett Highway) will determine which way you turn. From the North Lake Area (Wisp) it would be a left turn onto Glendale Road. Glendale Road is just south on Rte 219 from Arrowhead/Unos and the Movie Theater, Near MacDonalds.

Follow Glendale Road over the Glendale Bridge and bear right staying on Glendale Rd. Follow for approx 3 miles to the right RIGHT TURN at North Glade Road (there is a sign for the North Glade Inn at this corner, right is the only way you can turn) Turn on North Glade and follow for a few miles until it reaches a stop sign and intersection at Route 495. Go across 495 STRAIGHT, onto Mellinger Road. Follow Mellinger Road for almost a mile until you reach a junction with a road coming in sharply from the left. Take this paved LEFT TURN (Spring Lick Road - sign was missing) and follow all the way from the top of the mountain down to the intersection with the Savage River Road, 4+ miles. If you hit route 495 again on the Mellinger Road you have passed the turn to Spring Lick.

At the junction with Savage River Road bear right onto Savage River Road and follow for one mile until you come to a chain link fence surrounding a weather station. Take the immediate sharp left turn at the end of the fence. Cars with low clearance can park on the road up top or park in the first spaces immediately on the left after turning. Suv's and trucks can take the right hand (rough) drive down a little further to the put in. Guides and boats will be down near the water.
